Nebbiuno, May 2021

Dear Sirs,

We are glad to submit you our documentation. They are several catalogues, which show the items manufactured by the respective factories.

For those who do not know us, we must present ourselves. Since 1975 we are charged with these business, managed by the family: the father (Francesco) and the children (Ferdinando and Ilaria).

To complete the presentation:

1. All the factories are only specialized in the sole manufacturing of the items that are represented in their catalogue.
2. The sales are direct from every factory. Each firm will invoice its own sales. (It is impossible to group in an only invoice items manufactured by two or more firms).
3. Our duties consist in co-ordinate the commercial activity of these factories. These manufacturers are of middle-little dimensions (with some exception).

Our co-operation offers some advantages: an only interlocutor for several products and firms; an important point of reference on the spot specialized in the production; a co-operation every time and for everything you need.

On your demand, we are able to send you some additional information, some offers and samples.

About some offers, we beg you to indicate us: items, denominations, catalogues, pages and quantities.

Besides, we are *glad to present you an exemplification of the machines* that you could be interesting for faucets' machining and finishing. The complete documentation is available on your request.

On your demand, *if you indicate us your specific request about the machines you are interested*, we will submit you our best proposal that is more suitable to your requirements.

We can assure you that all these suppliers of machines are well known and their customers are all over the world.

We are at your disposal for further information and we give you our best regards.

Nebbiuno, Mai 2021

Messieurs,

Nous avons le plaisir de vous envoyer notre documentation. Il s'agit des plusieurs catalogues qui présentent les produits fabriqués par les usines respectives.

Pour ceux qui nous ne connaissent pas, nous avons le devoir de nous présenter. Depuis 1975, nous sommes chargés de ces affaires, gérées par la famille : le père (Francesco) et les enfants (Ferdinando et Ilaria).

Et pour compléter la présentation, nous vous précisons que :

1. chaque usine est uniquement spécialisée dans la seule fabrication des articles insérés dans son catalogue ;
2. les ventes sont directes par chaque usine. Chaque usine facturera ses ventes. (Il n'est pas possible de grouper dans une seule facture des produits de deux ou plusieurs fabricants) ;
3. nos fonctions consistent à coordonner l'activité commerciale de ces usines. Les usines ont des dimensions moyennes-petites (avec des exceptions).

Notre collaboration présente beaucoup d'avantages : un seul interlocuteur pour plusieurs produits et usines ; un important appui au site spécialisé dans la fabrication et la coopération chaque fois qu'il le faut !

Sur votre demande nous sommes en mesure de vous envoyer tous renseignements complémentaires, des offres et des échantillons.

Pour ces offres, nous vous prions de nous spécifier : articles, dénominations, catalogues, pages et quantités.

En plus, nous avons le plaisir de vous soumettre une exemplification des machines auxquelles vous pourriez être intéressés pour l'usinage et la finition des robinets. La documentation complète est disponible sur votre demande

Si vous nous indiquez votre particulier demande concernant les machines auxquelles vous êtes intéressés, nous vous enverrons notre meilleure proposition qui sera plus correspondant à votre requête.

Nous vous assurons que toutes ces usines, fabricantes des machines, sont bien connues et que leurs clients sont dans le monde entier.

Nous restons à votre disposition pour tous renseignements complémentaires et nous vous prions de trouver ici, Messieurs, l'expression de nos sentiments les meilleurs.

Flexible hoses for water connection

Stainless steel DN8 Series

Technical data:
Operating temperature range:
From 5° C to max 90 ° C
Max operating pressure 10 bar
Internal liner made by EPDM rubber Ø 8
External Ø 12
AISI 304 stainless steel braiding
Minimum guarantee coating 95%
Stainless steel sleeves

G= inserted gasket on request

Flexible hoses for water connection

Stainless steel DN10 Series

Technical data:
For hydro-sanitary use only
Operating temperature range:
From 5° C to max 90 ° C
Max operating pressure 10 bar
Internal liner made by EPDM rubber Ø 9,5
External Ø 14
AISI 304 stainless steel braiding
Minimum guarantee coating 95%
Stainless steel sleeves

G= inserted gasket on request

Flexible hoses for water connection

Stainless steel DN13 Series

Technical data:
For hydro-sanitary use only
Operating temperature range:
From 5° C to max 90° C
Max operating pressure 10 bar
Internal liner made by EPDM rubber Ø 12,5
External Ø 17
AISI 304 stainless steel braiding
Minimum guarantee coating 95%
Stainless steel sleeves

G= inserted gasket on request

Antivibration Flexible hoses

Antivibration flexible hoses (galvanized stainless steel hoses)

Antivibration flexible hose for low pressure installation (pumps, autoclaves, radiators, heating and conditioning systems)

Technical data:
Atoxic EPDM liner suitable for drinking water and not Corrosive liquids
Operating temperature range:
From 5° C to max 90° C

Braiding:
Galvanized steel
Nickel plated or raw brass connectors

Connectors Series: M/F or F/F

Aluminium sleeves

Gas hoses

Gas hoses for indoor appliances EN 14800

Technical data:

Hose: Stainless steel AISI 304

Male fitting: Stainless steel AISI 303, thread as per EN 14800 standard

Ferrules: Stainless steel AISI 303, seal in compliance with EN 14800 standard

Nut: Stainless steel AISI 303 thread conform to EN 14800 standard

Braid: stainless steel AISI 304, wire Ø 0.25 mm, 4 wires for each group, for total of 96 wires

Protective cover: Yellow PVC

Gasket: nitrite rubber as per EN 549 standard

Stainless steel hose made by a metallic braid and an external coating, the ideal solution for connecting gas household appliance (stoves, etc.) with nominal heat input not exceeding 35 kw to gas supply lines. This hose is manufactured in compliance with the European standard *EN 14800* and carries the *CE* mark.

The external plastic coating aims at protecting the hose from potential damages caused by the surrounding environment.

Shower columns

How to choose the right column

The column can be adapted to the existing taps and fittings as per the following systems

A system

the shower has an external mixer with diverter and upper connection, as per the below picture

B system

the shower mixer has the upper connection without diverter, as per below picture

C system

In case of concealed mixer it is required the wall water connection

D system

In case there is a concealed mixer and an external mixer too, the D solution, including a diverter and a shower support with shower connection, is the right one
